Acknowledgments

The editors wish to acknowledge the invaluable assistance of several colleagues, at the NOAA Office of Climate Observation, whose efforts were instrumental in completing this report. Yasunori Hanafusa, on assignment to OCO from the Japan Agency for Marine-Earth Science and Technology, volunteered long hours, far beyond the call of duty, to meticulously review and format many sections of the text. Todd Pearce provided the IT support that allowed us to exchange draft chapters with authors and to communicate among ourselves. Craig Joyner, and Keith Hayes provided much needed assistance with perplexing software, and Jonathon Brooks indefatigably coerced uncooperative computers back to life when large files brought them to their knees. We are grateful to these modest and helpful professionals for doing so much of the hidden work that was necessary to bring this report to fruition.
